

Dear Comrades,

Let us try to understand in very clear terms the ulterior designs of the policy makers, the government, and collaborators of the govt. in creating a subsidiary tower company owned so called by BSNL. If we have been tracking recent developments in the telecom sector, everyone of us can very easily conclude that every policy decision of the govt., regulator, bureaucracy is unmistakably aimed to facilitate smooth and unhindered roll out of Rjio, even at the cost of BSNL which is nothing but a prestigious and strategic telecom institution of the Country.

In this context, a sustained campaign is launched recently and suddenly by Secy/Dot , bureaucracy and TRAI to create public awareness by propagating that high radiation limits emitted from towers are quite permissible and not dangerous. Suddenly, reports of expert committees are being dug out to justify permissibility of high radiation limits, almost double of what was permissible prior to roll out of Rjio. So that leaves us in no doubt to what extent the govt. is ready to go, even at the cost of human life and unpardonable environmental degradation, to facilitate quick and smooth tool out of Rjio. In the run up to quick launching of Rjio, PM has virtually forgotten that he owns a gigantic telecom company of the country and that it is his fundamental responsibility to fully safeguard the legitimate interests of the company he fully owns. PM in his clamour and lust to promote Rjio , come what may and at any cost , is completely unmindful of the great and unparalleled role that BSNL has all along played in meeting social obligations of telecom policy and converting the dream of every Indian to get digitalised. Digital India is inching towards reality only because of exclusive role of BSNL in creating massive and massive country wide telecom infrastructure in terms of optical fibre, switches, local network and what not. PM needs to be reminded about the great and exemplary contribution of BSNL in making Digital India a reality and the only way to force PM to reckon this reality is through an intense and tireless struggle

because the PM is so closely and intimately surrounded by Rjio that only a prolonged and committed struggle will force him to come out of this nexus and recognise ground realities .

Comrades, creation of subsidiary tower company is going to be the beginning of the end of BSNL if we do not defeat successfully this dangerous and well calibrated attack on BSNL to systematically disintegrate it and split it into pieces. The larger and grand design behind this diabolical move of the govt. is to bring in RJio in due course of time as strategic partner of this company and facilitate him to roll out his services by capturing our towers. The larger conspiracy is to disintegrate and destabilise BSNL so as to finally hand over the company to LALAS like Mukesh Ambani, Sunil Mittal etc etc. The govt has started working out in this direction in a well planned manner.

The most critical and significant issue is that do we allow this prestigious national telecom institution which is showing visible and positive signs of positioning itself as a challenging, formidable and vibrant service provider in telecom sector once again to decay and eventually die. No, not at all. We have to come out in strongest possible way to expose the sinister plans of the govt. to disintegrate and destabilise this great and beloved company of the Nation. So let us recall our huge capacity to hit back at vested interests with our greatest mite and force and expose their devilish moves to disintegrate this company. Instead, let us get ready to tear this govt. into pieces for its sinister plans to tear this company into pieces. Let us now get ready for what is going to be truly a historical struggle to save our beloved company from disintegration. Posterity should remember us as heroes for saving this prestigious national telecom institution from being sold to vested interests. It is real testing time for our unity and solidarity to safeguard our beloved company the way we have safeguarded it so far.
